

Installing Your Free Snapshot Expansion

Hello,

Thank you for your purchase!

This guide will help you locate the correct folder for installing your **free additional Snapshot Expansion** for your Kontakt 8 Player instrument.

Installation Location

Copy the supplied Snapshot files into the appropriate **User Content** folder for your operating system.

macOS

Macintosh HD/Users/<username>/Documents/Native Instruments/User Content/

Windows

C:\Users\<username>\My Documents\Native Instruments\User Content\

Replace <username> with the name of your user account.

Installing the Snapshots

Inside the **User Content** folder, locate the corresponding folder for your Kontakt instrument.

Copy the supplied Snapshot files into this instrument/library subfolder.

The default User Content locations shown above are the locations specified by Native Instruments for user-created and additional Snapshot content.

After copying the files, open Kontakt 8 Player and load your instrument. Your newly installed Snapshots should now be available in the instrument's Snapshot browser.
